

FENDT

GROW BOLD.

PUT US TO WORK— ANYWHERE, EVERYWHERE.

You say dairy; we say multifunction
versatility in every Fendt tractor range.

With its impressive family of tractors ranging from 124 to 550 HP, Fendt offers dairy producers fuel efficiency second to none, with many Fendt owners reporting up to 25% fuel savings. The innovative VarioDrive drivetrain of the models 203 HP and up boosts productivity with seamless, smooth control and ideal torque distribution to front and rear wheels for optimal traction and tractive power in every situation.

With the Fendt iD low engine speed concept, Fendt Vario tractors operate at 650–1,700 engine RPM with higher torque, lower fuel consumption and smooth, quiet operation. The quiet continues with the FendtONE™ cab, customizable to give you the settings, control and comfort to suit your needs.

Take the **Fendt 500 Vario Series** (four models from 124 to 163 HP) and the **700 Vario Gen7 Series** (five models from 203 to 283 HP). Both tractor series come with an incredible power-to-weight ratio while being nimble enough to turn tightly and easily maneuver loaders, blades, snow blowers and other implements in your pens and alleyways.

Moving up in HP, the **Fendt 900 Vario Series** has five models from 296 to 415 HP to take to the field for tillage, planting, harvesting and haying; use to haul, push and pack silage; and depend on day-in and day-out to mix and deliver feed or haul and spread manure. Amp all of that up with the new **Fendt Vario 1000 Gen4** line, four models from 426 to 550 HP to handle the most demanding tillage, heavy-duty seeding and transport work for your operation with the best fuel efficiency in their class.

BOLDER IS BETTER FOR YOUR BUSINESS.

Fendt pushes beyond industry standards through relentless innovation to bring top productivity and sustainable solutions to your operation.

Our Fendt Vario® Tractors range from 94 to 673 HP, all with top fuel efficiency and a premium in-cab experience with the FendtONE™ operating system.

The full Fendt lineup delivers excellence and efficiency for everything from planting to harvest.

Fendt Momentum® and Optimum™ Planters feature industry-exclusive variable contouring toolbars that hug the terrain and deliver top yields with the latest technology from Precision Planting®.

Fendt Rogator® 900 Series Applicators precisely deliver liquid and dry products from the same rear-boom chassis. The dual-height option makes a full-year application season possible with one efficient crop-care machine.

Fendt IDEAL® Combines in four class sizes (7 to 10) save valuable time with their fast unloading speed and optional joystick steering with IDEALdrive™ while harvesting clean, high-quality grain.

FUEL EFFICIENCY,

Our dairy customers tell our story best.

FENDT TRACTORS = QUALITY, EFFICIENCY FOR CALIFORNIA DAIRY

Josh De Jong counts on his fleet of eight Fendt tractors to feed and care for his 4,500 head of dairy cattle at Ramona Dairy in San Jacinto, California. The Fendt 900 Series tractors running the feed wagons each work at least 4,300 hours a year as they feed a half million pounds of mixed alfalfa green chop, corn silage and feed byproducts every day.

De Jong and his team say they like how well the Fendt tractors are built and how efficient they are compared to their former brand. "Just the fuel difference alone makes the payment on the tractor," he says.

Fendt 500 and 700 Series tractors are used to keep the corrals clean. The staff appreciate the creature comforts and ease of use. "From an operator standpoint, it's a fun tractor to run," De Jong says. "Nice cabs on them."

LARGEST CONNECTICUT DAIRY: POWERED BY FENDT

When Oakridge Dairy in Connecticut modernized its facility eight years ago, it went all-in on a high-tech barn with a rotary milking parlor. It milks 72 cows at a time, 426 cows per hour, with just five employees on the floor.

The increased production called for more crop acreage and cutting-edge machines in the field and across the operation, and Fendt tractors were the right match for the job.

Crop manager Johnny Hoffman switched from tractors of a different green to run two Fendt 930s, a Fendt 824 and a Fendt 828 to mow, merge hay and haul manure as well as to plant and harvest crops and even plow snow.

“They can do any job on the farm ... [just] sipping fuel [even] when they’re hauling 6,300 gallons of manure up the road,” Hoffman says. “The tractors add so much value and efficiency to our dairy.”
